

To change the location of the dock:

- Click on System Preferences on the dock
- Click on Dock
- Position on screen – change to left or right

To hide the dock:

The Dock will sit idly on whatever side of the screen you tell it to, but if you prefer, you can hide the Dock so that it only appears when you move the arrow to that side of the screen. To hide the Dock, do one of the following:

- Click on System Preferences on the dock
- Click on Dock
- Check “Automatically hide and show the dock”

Magnify dock icons

When you move your arrow over a docked icon, the icon grows bigger. But you can choose how big or small the magnification should grow to, and how big or small the Dock should appear in its normal state.

- Click on System Preferences on the dock
- Click on Dock
- Check “Magnification”
- Adjust percentage of magnification
