

## Launchpad

The keyboard shortcut to open Launchpad (the rocket on the Dock) is **F4**.

For those of you asking, “What is the Launchpad”?

The Launchpad shows all of your apps (similar to how the Windows Start button showed all the programs on the PC). To open an app, simply click on its icon.

If there’s not enough room to show all of your apps on one screen, Launchpad creates multiple pages. The dots at the bottom of the Launchpad show you how many pages you have and which page you are currently on.

To move between pages:

- Click on a dot at the bottom of the Launchpad screen
- Swipe left or right with two fingers on your trackpad (Make sure your mouse is somewhere on the Launchpad and not on the Dock. It won’t work if your mouse is pointing to a spot on the Dock.)
- Search for the app you are looking for using the Search box on the top of the Launchpad

If the Launchpad is open, pressing **F4** will close it.
